

Embedded Configurator

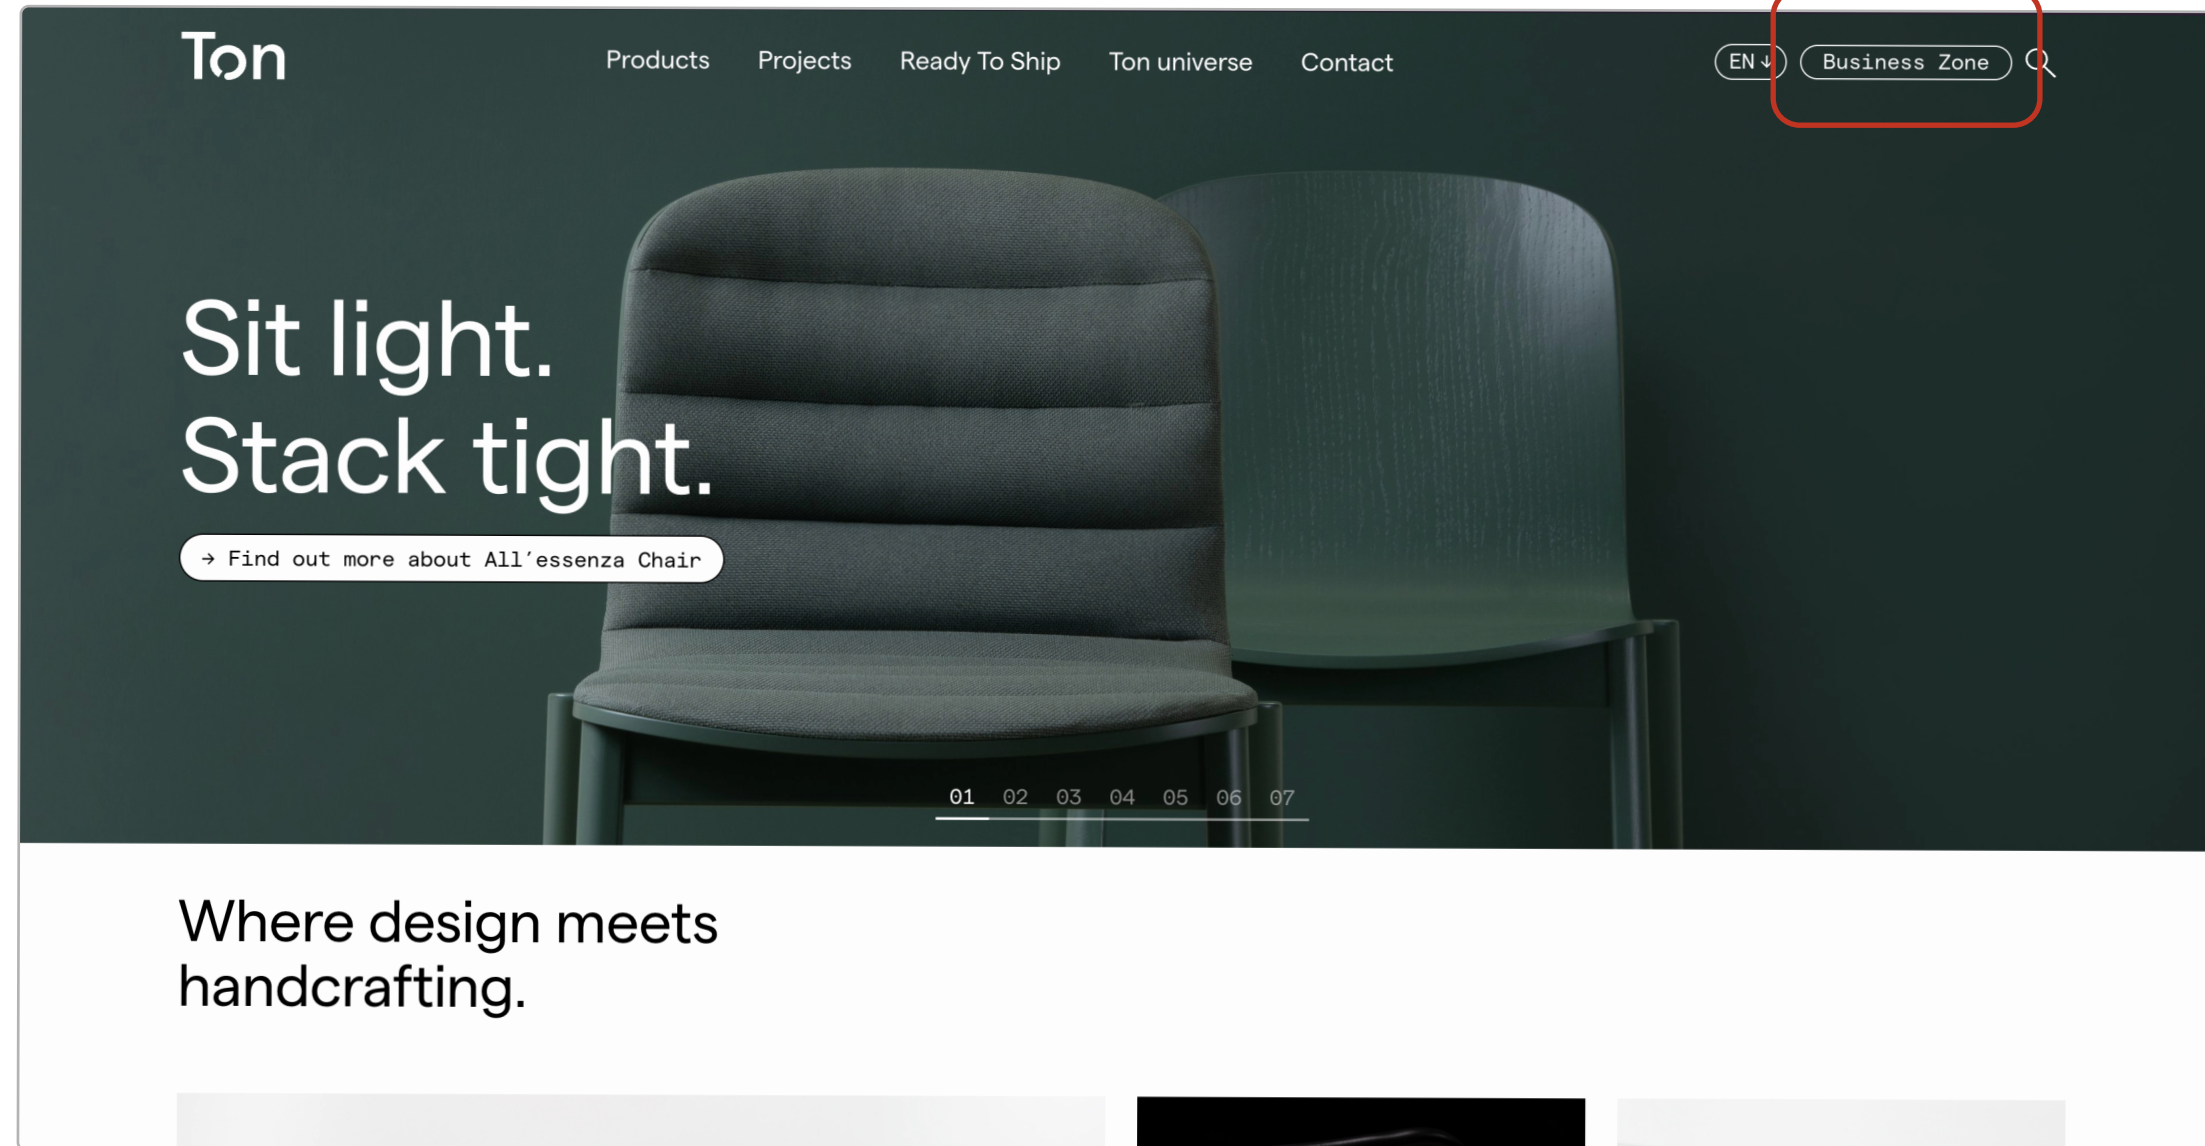

How to add it to your webpages

Ton

1.

Log in/register into our Business Zone on our webpages business-zone.ton.eu/en you need to be registered as “Dealer”.

A

B

C

Personal information

What is your role?*

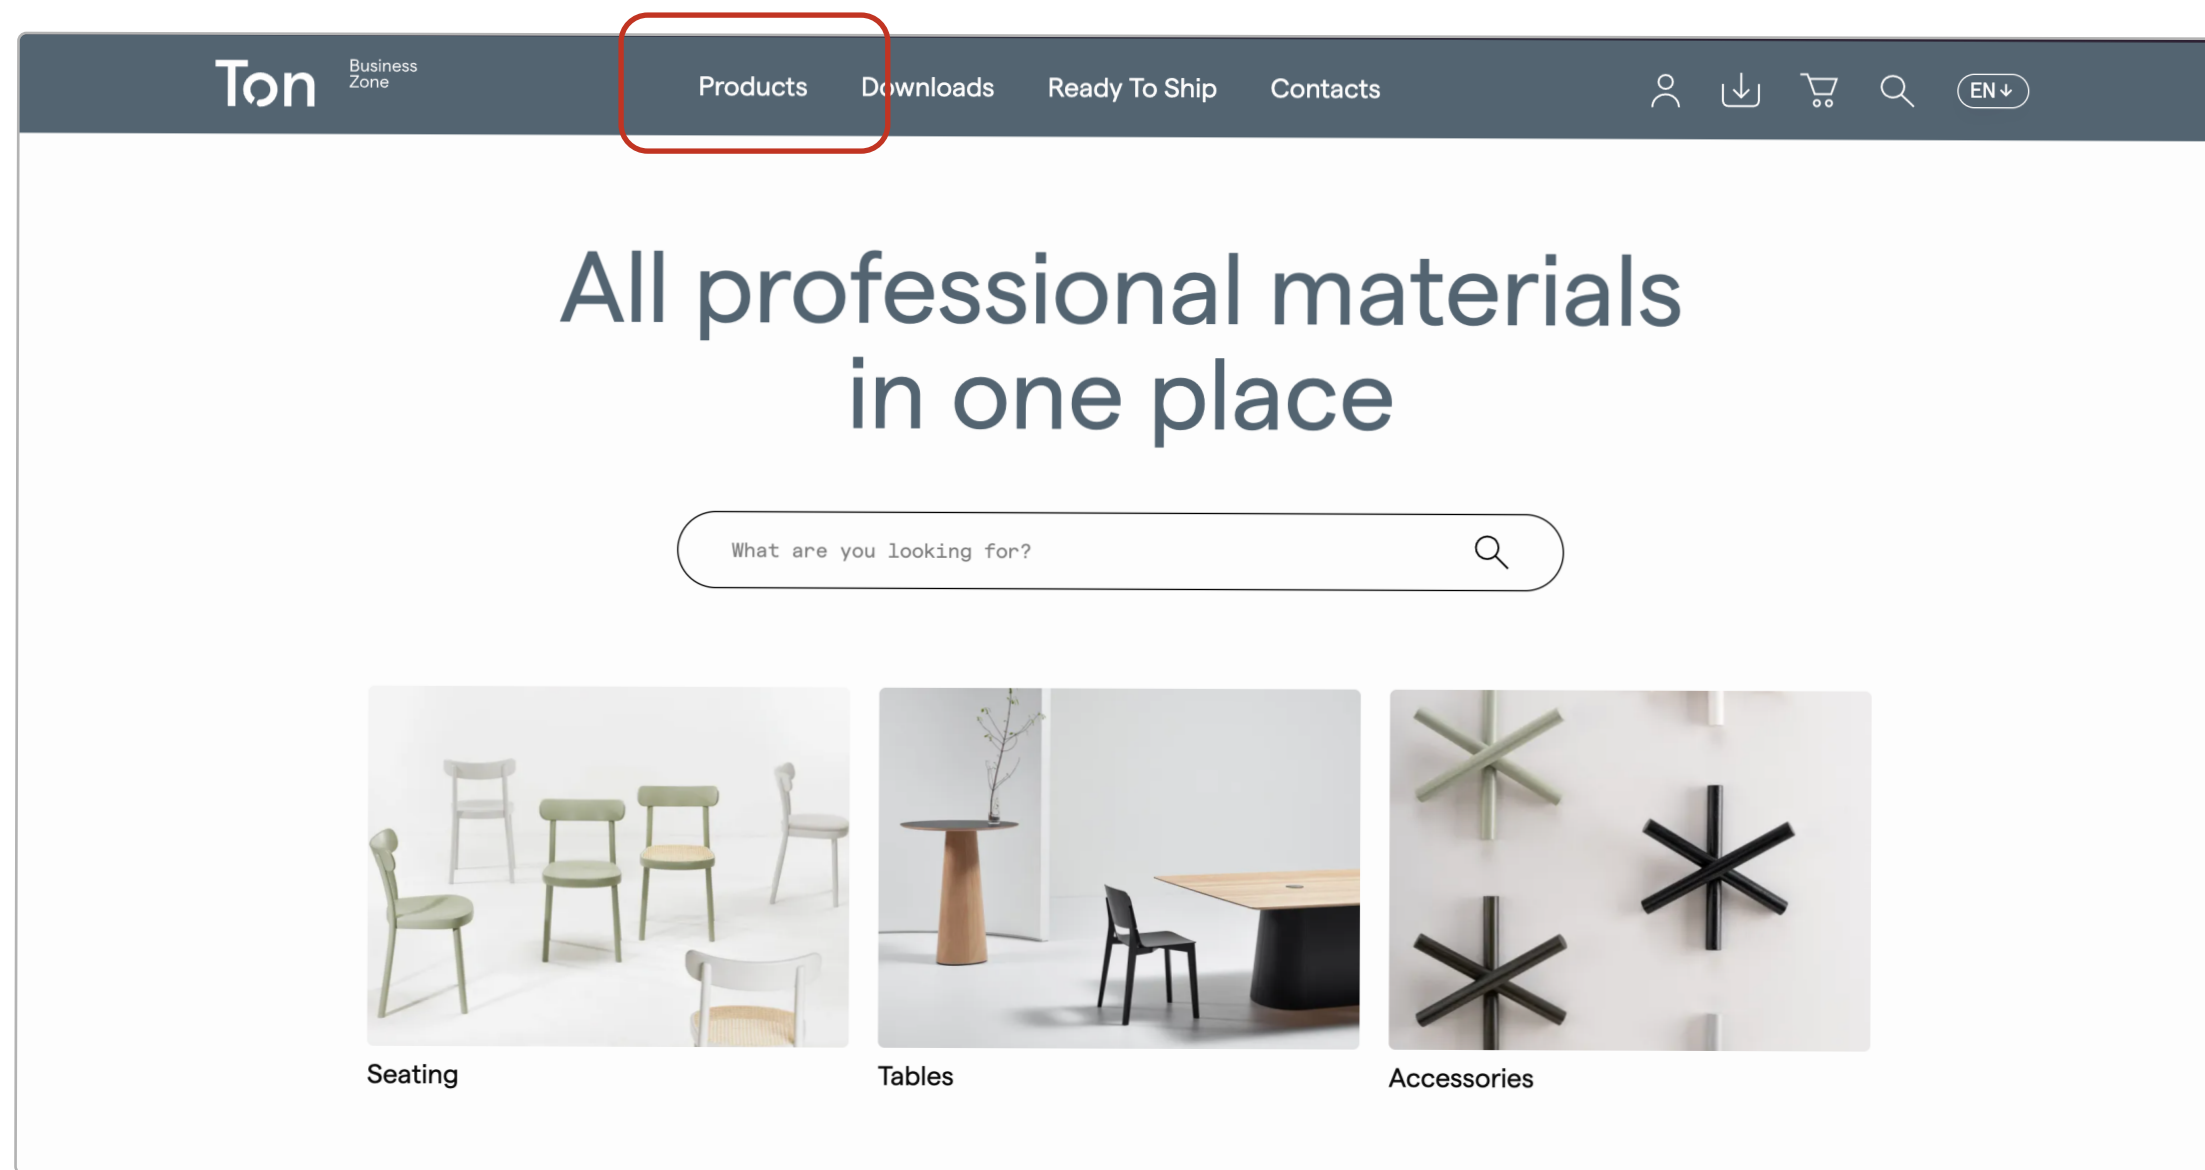

Dealer

Ton

2.

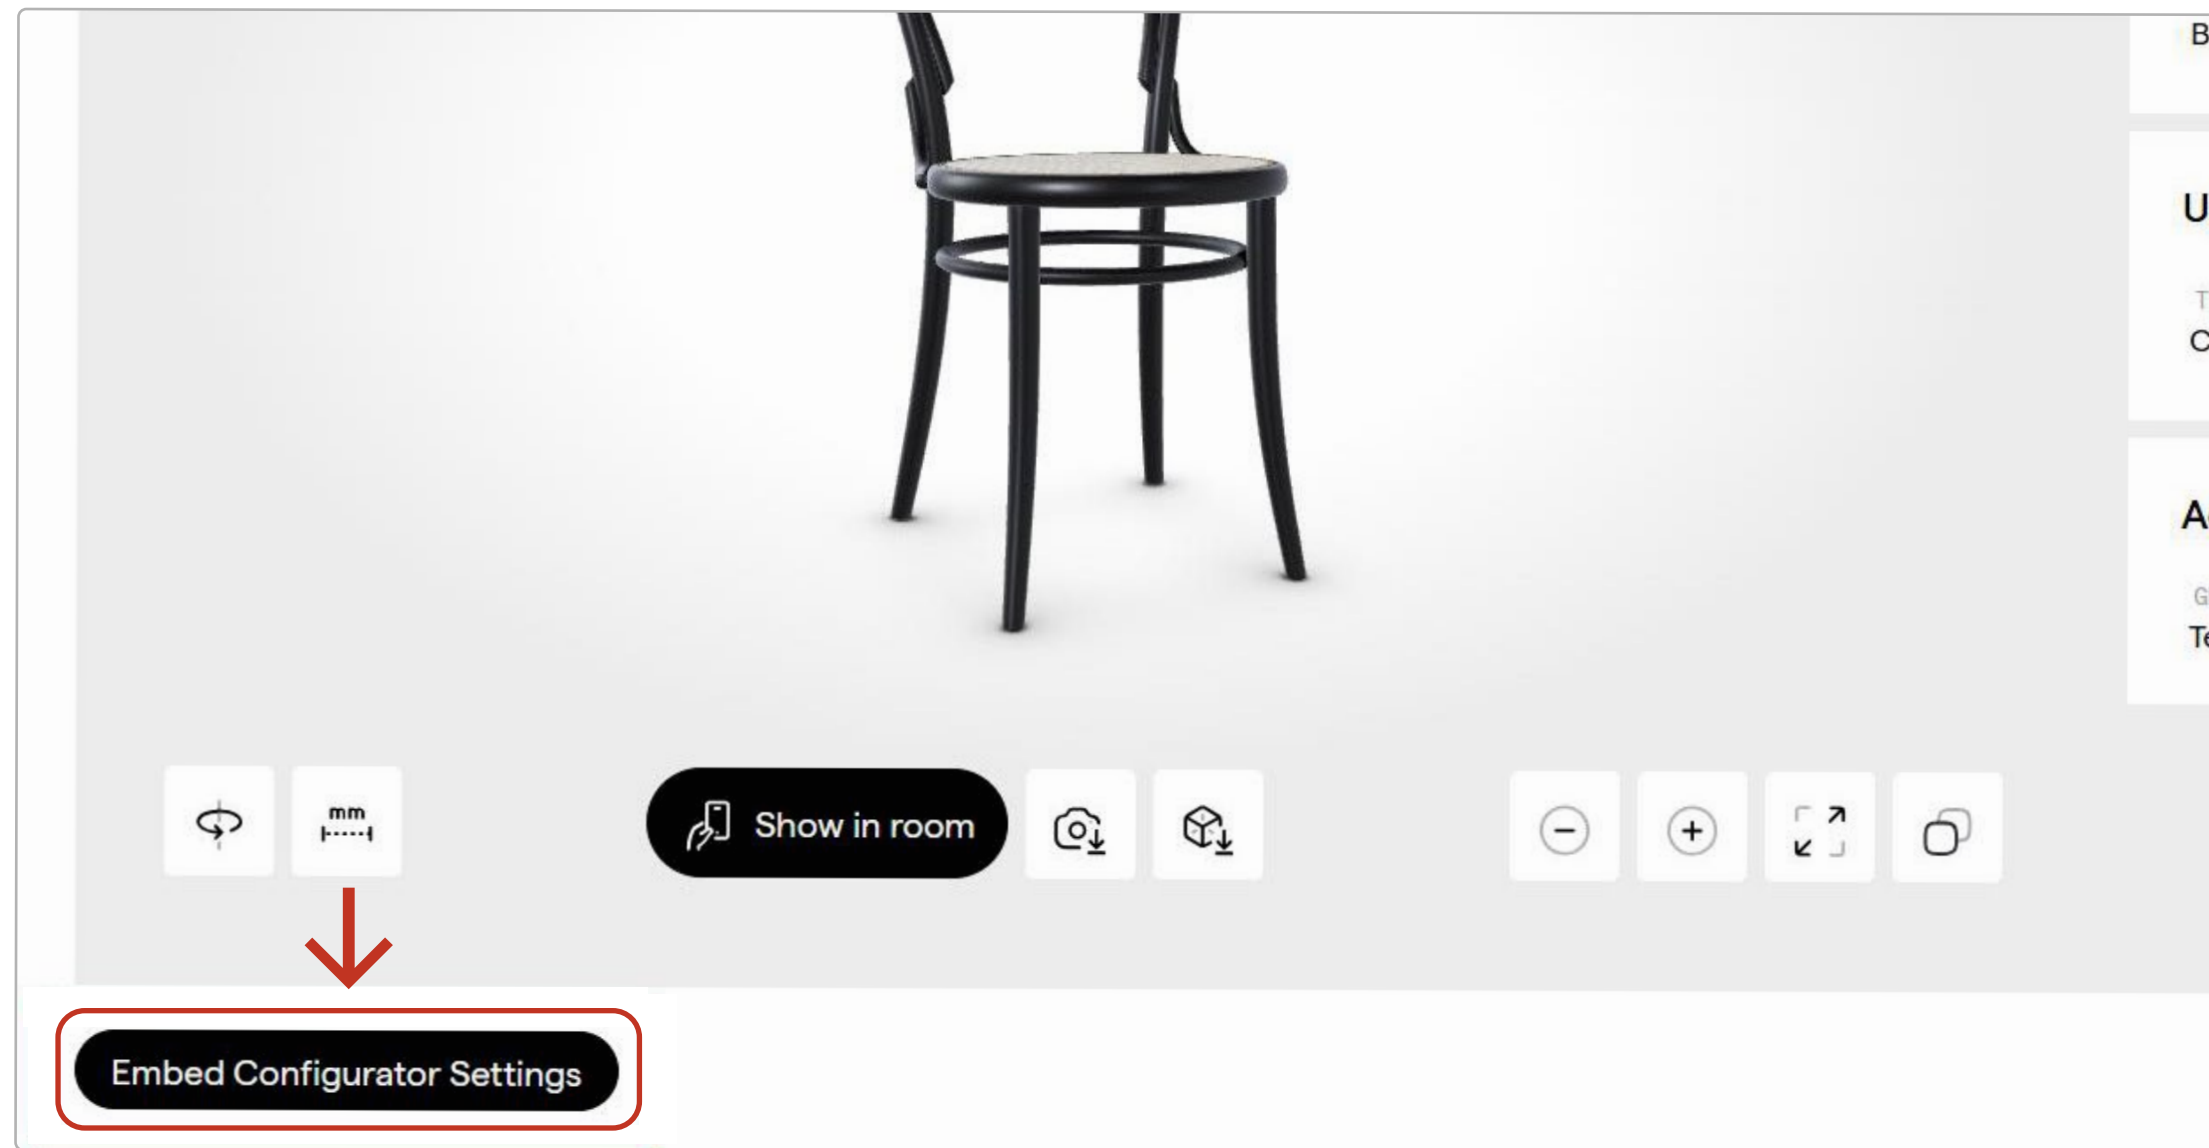

Go to Product page of the product you would like to display on your webpages.

Online configurator always displays only that 1 selected model, you can place all the products on your webpages one by one.

Ton

3. Scroll down just below the online configurator and click on the button “Embedded Configurator Settings”.

Ton

4.

In the settings you can select:

→ **Hide right column with variant settings**

Disables the option for users to select or change variants in the configurator. Only the variant you preselect will be displayed, and users will not be able to modify it.

→ **Hide inquiry button**

Hides the inquiry button in the configurator.

→ **Email address where inquiries will be sent**

All inquiries submitted via the **Inquiry** button will be sent to this email address. When a user configures a chair and submits an inquiry, you will receive the exact configured variant along with the user's contact details as entered in the form.

→ **Generated code**

This is the code that should be embedded into your website to display the configurator according to the selected settings.
